

WÜRTH Industrie Service

ELECTRONIC DATA EXCHANGE VIA EDI

Let your systems communicate.

EDI – Electronic Data Interchange – is very simple to understand. EDI replaces paper documents with electronic documents. The data is communicated in a defined standard format. As a result, both the sender and receiver are able to read the document accurately. This is suitable, for example, for orders, delivery notes and invoices.

OUR SERVICES FOR YOU

- ✓ **Experience:** More than 1500 successfully connected employees
- ✓ **Flexibility:** All commercially available formats and transmission routes can be catered to
- ✓ **Options:** Exchange of electronic orders, delivery schedules, delivery notes and invoices
